

HSSE EVENT IDEAS

ADHFREE FREELANCER.COM

For the first submission, I will submit several ideas related with Health, Safety, Security and Environment (HSSE) event. If you like my ideas, I will prepare detail plan complete with budgeting for each ideas.

As stated in your description, I create these ideas for corporate events. These ideas will be event for team or/individual activities. I agree that some popular HSSE events like planting trees, walk-a-thon, blood drive, etc. is common ideas and need other ideas that will increase HSSE awareness.

Here is some idea that will increase employee awareness for HSSE.

1. My first idea is HSSE contest. These will be divided into several contest (team/individual). The purpose of these contest are to increase your employee awareness about HSSE especially in their work environment. The contest can be run separately or as a whole event activity.
 - a. HSSE innovation contest, is a team contest to find some innovation ideas to improve HSSE implementation. By this contest, you can push each employee to aware about HSSE and you will get best ideas for HSSE improvement.
 - b. HSSE prevention contest, this is individual contest. Preventing lost, accident, environmental damage, etc is the best way in HSSE implementation. Each employee have to aware about HSSE in their working environment. By this contest, each employee encouraged to make some reports about everything that potential become an accident or other

- HSSE issues. Each reports will produce points, employee with highest points will be a winner.
- c. Photo and poster contest with HSSE theme. This is individual contest. Each employee can take a photo about HSSE in their working environment or they can create some poster that give information about the importance of HSSE. The result from this contest is Photo and Poster that you can use in your company.
2. Second idea is fun event. The event will be gokart/ATV race or/and paintball. You can use both activity to make an event with HSSE theme. For example, driving gokart and playing paintball are example how safety gear will protect life. You may also create a story about security that will be dramatic scene in the battle arena for employee teams, and also environment awareness will be additional points that will be collected during this battle. This idea will be very fun event to introduce and increase HSSE awareness.
 3. Third idea involve technology, this idea inspired from pokemon go apps but simpler. The event idea is battle between teams on each section/department in your company. Using mobile phone applications, each team can report other teams by take a photo of everything related with HSSE violation. Team who report the violation will get 3 points and team get reported will decrease 1 point. You can place flag or mascot image on each team area. Using Augmented Reality (AR), everyone can check who is the best team and who is the worst (by using AR, everyone can point their camera to the mascot image and can see animated image that will explain winner condition). This event like competition, the point will be collected weekly and

the final events will to choose a winner can be held twice or three times a year. The purpose of this event is to create fun event while you can keep your employees aware about HSSE. AR technology is easy, create this kind of apps need about USD 1000-1500, you can use this apps for years. To stimulate your employees, you can offer awards for the winner.
